

Engineering
Gateway to the World of Polymers

AUTHORISED DISTRIBUTORS OF

CLARIANT CHEMICALS (INDIA) LIMITED

REMAFIN® for Olefins & RENOL® for Non – Olefins Colour Masterbatches
PP, ABS, Nylon, PET, PBT, HIPS, TPE & POM compatible Masterbatches

Hydrocerol

To Reduce Density & Weight
Shrinkage, Warpage and Sink Mark
Improving Productivity upto 20%

Processing AIDS

Reducing friction between the melt
& the metal Parts to facilitate processing
& improvement in output

Antistatic Agents

Prevent a buildup of static Electricity /
dust on polymer Surfaces

Antioxidants

Inhibit or retard polymer oxidation
and its degrading Effects

UV Stabilizers

Protection against
Sun lights & Heats

Flame Retardants

To Meet UL Standards by minimizing
Smoke and Heat Generation

HTR – High Temperature Pre Coloured Compounds

Resins & Masterbatches for Automotive,
Electrical & Electronics

Speciality / Additive Masterbatches

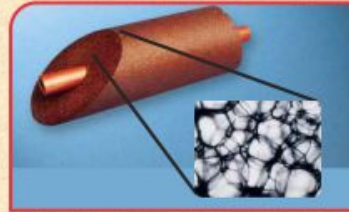

CHEMICAL FOAMING & NUCLEATING AGENTS

HYDROCEROL® to reduce

- Part weight
- Cycle time
- Warping and sink marks

and improve

- Melt flow
- Dimensional stability
- Smooth part surface,

Available in various sizes of granules and as powders

HYDROCEROL® foaming and nucleating agents for
PP, HDPE, LDPE, LLDPE Polystyrene, ABS PET,
Polycarbonate, PC/ABS, Nylon TPE, , TPR PVC

Foam extrusion, used in the manufacture of film, sheet,
profile and pipes.

Foam injection molding, used in the manufacture of
lightweight structural parts.

Direct-gas extrusion, used in the manufacture of
physically blown film and sheet.
